Data Science Intern

Pursuing a Master of Science in Big Data and Machine Learning, I'm an upcoming graduate with strong math background and 1+ year of experience as Data Scientist Apprentice. Proficient in data manipulation and exploration, with hands-on experience in data analysis and developing Machine Learning algorithms. Actively seeking an internship opportunity to enhance skills in Machine Learning, AI and data-driven decision-making.

CORE COMPETENCIES

Data Aptitude ♦ Machine Learning/AI ♦ Statistical Analysis ♦ Data Visualization ♦ Database Querying ♦ Programming ♦ Version Control (Git/GitHub) ♦ Problem-solving ♦ Project Management ♦ Communication ♦ Teamwork

Data Science: R ♦ Python (Pandas, Numpy, Scikit-learn, TensorFlow, PyTorch, Streamlit, Plotly, Seaborn...)

Data Engineering: ETL Pipeline ♦ Java ♦ Scala ♦ Spark ♦ Apache Kafka ♦ Docker ♦ Azure ♦ GitHub Actions

Database Management: RDBMS (MySQL, PostgreSQL, Oracle) ♦ NoSQL DB (MongoDB, Redis, Cassandra, Neo4J)

Web Development: Java ♦ SpringBoot ♦ Flask ♦ Django

EXPERIENCE AND ACHIEVEMENTS

SOCIETE GENERALE FRANCE, Paris, France

September 2022 – Current

Data Scientist Apprentice | SQL, Python, NumPy, Pandas, Excel VBA

- ♦ Conduct in-depth data analysis to gain insights into the data model and assess client companies' environmental impact.
- ♦ Develop and optimize advanced algorithms for precise evaluation of the environmental footprint, focusing on CO2 emissions. Achieved an outstanding 97% accuracy rate in classifying 150 companies.
- ♦ Engineer programs to retrieve data from APIs and harmonize diverse data formats from 5 sources, resulting in a 50% reduction in overall processing time for over 15,000 requests.

SOCIETE GENERALE FRANCE, Paris, France

September 2022 – Current

Software Engineer Apprentice | Java, TypeScript, Angular, Spring Boot, SQL

- ♦ Collaborated in a team of 4 and refactored an internal web application by introducing Restful API service and designing an intuitive statistic dashboard, resulting in a 92% improvement in user satisfaction based on post-update surveys.
- ♦ Orchestrated thorough UAT procedures and documented the outcomes, identifying 90% of production environment errors before they impacted end-users.

PROJECTS

ETL Pipeline with Drone Simulation

February 2023 – May 2023

Scala, Apache Kafka, Spark, HDFS

- ♦ Developed a Big Data solution with 3 side: Simulating drones that generate data every 3 seconds; Real-time monitoring data using Kafka for immediate alerting in critical situation); Performing in-depth data analysis with Spark Analytics.

Data Analysis and Visualization with MovieLens Dataset

November 2022

Python, Plotly, Pandas, Streamlit

- ♦ Deployed a Streamlit application for data analysis and data visualization of a dataset of 25M+ records.

EDUCATION

Master Big Data and Machine Learning

September 2022 – September 2024

EFREI Paris, Engineering School of Computer Science, Paris, France

- ♦ GPA: 3.7 (16.88/20)

- ♦ Courses: Data Science, Machine Learning, Big Data Frameworks, Data Engineering, DevOps, Database Management

Bachelor Data Science and Statistics

September 2021 – September 2022

Lumiere Lyon II University, Lyon, France

- ♦ GPA: 3.5 (14.25/20)

- ♦ Courses: Artificial Intelligence, Data Structures and Algorithms, Statistics

LANGUAGES

English: Fluent C1 (955/990 TOEIC)

French: Fluent C1
